SKILLS

Programming Languages Python | Java | C# | JavaScript | C

Technologies AWS- EC2/S3/Lambda | Google Cloud- GKE/Firebase | Docker | React.js | Unity | .NET

EXPERIENCE

Meta

Feb 2024 - Present

Software Engineer

Menlo Park, California

- Revamped News Reputability pipeline, enhancing reliability by reducing external calls and cutting runtime from 8 days to 4 hours
- Led sensitive data deletion involving tens of billions of records across multiple databases with dry runs, automated rollout and disaster recovery

Field-S

Dec 2023 - Feb 2024

Software Engineer

Seoul, Korea

- Built MVP version of Flutter + Google Cloud based social media app in 3 weeks (5 weeks ahead of schedule)
- Created PostgreSQL schema and secure Flask API interface using Google Identity Platform for server-sided Role Based Access Control
- Organized 16,000-row datasets and utilized OpenAI Node to tune 24 GPT-3.5 prompts for grading English proficiency tests.
- Resolved longstanding "database freezing" bug by tracing down a reused SQL connector unsafe in concurrent execution

Puzzle Cats

Jan 2021 - Dec 2023

Software Engineer

Toronto, ON

- Architected a scalable replay system for mobile games' bot AI using cloud services, handling 100,000+ replays without impacting user devices
- Ranked 1st on App & Play Stores for Minigolf keywords on new Unity game developed in team of 3
- Created Node & Chart.js monitoring system in 5 of our services, and identified unauthorized DB access with it
- Redesigned data pipeline using Firebase and S3, resulting in a 24,000% speed increase and a 98% reduction in data issues
- Managed one engineer's development on a \$1M/year product line & helped them achieve higher perf rating

Manulife

Jan 2020 - Dec 2020

Software Engineer Intern / Part Time

Waterloo, ON

- Developed internal tool with React, Express, & MongoDB for customizable and preset requests to ServiceNow
- Led Software Intern hiring committee and achieved record time hiring cycle by gathering 24 volunteers, 14 more than prior semester, to execute new hiring plans
- Awarded at townhall for creating Slack bot using Docker, Typescript, and Bolt SDK with >90% test coverage

BlackBerry

Sep 2018 - Dec 2018

Software Engineer Intern

Waterloo, ON

- Averaged 12% code coverage increase across 4 BlackBerry brand Android apps using Java Espresso API
- Saved manual testing team 6 hours biweekly by automating load performance and resource benchmarks

NOTABLE PROJECTS

2009scape.org

Apr 2017 - Dec 2023

Cofounder

Ottawa, ON

- Created open source RuneScape emulator and fostered culture to 100+ contributors, 20,000+ commits, and over 1 million lines of code

Monero Tips Bot

Mar 2019 - Jun 2021

Full Stack Developer

Ottawa, ON

- Founded a corporation to integrate Monero into Reddit, winning CUSEC 2020 Demo and 4,000\$ in awards
- Implemented UI in Python with PRAW and back-end with JSON RPCs to a hardened Monero daemon

EDUCATION

Bachelor of Computing - Computer Science

Sep 2016 - Apr 2021

University of Guelph, Dean's List

Guelph, ON
